PROJECTS

Personal Portfolio Website

Full-Stack Project

Keywords: React Router DOM, MongoDB, Express, Node.js, MVC, Render

- Developed and deployed a MERN stack portfolio with React Router DOM.
- Implemented a backend-powered contact form storing data in MongoDB.
- Built an admin dashboard to manage client messages, strictly following MVC architecture and hosted the application on Render.

Weather Forecast App

React Project

Keywords: React.js, OpenWeather API, Tailwind CSS

- A React-based weather application that fetches real-time weather data using the OpenWeather API.
- The app allows users to search for cities and view temperature, humidity, wind speed, and current weather conditions.
- Built using React hooks for efficient state management and a clean, user-friendly interface.

Gym Landing Page

Front-End Project

Keywords: HTML5, CSS3

- Developed a Gym Landing Page using HTML and CSS to strengthen foundational web skills.
- Focused on creating modern, responsive, and user-friendly web pages, with plans to integrate React.js for added interactivity in the future.
